

Backflow Prevention: Safeguarding Water Quality

ON THE SCALING UP! H2O PODCAST

A MUST-LISTEN EPISODE FOR INDUSTRIAL WATER TREATERS

Scaling UP! H2O, the leading podcast for water treatment professionals, is set to release a compelling episode titled "Backflow Prevention: Safeguarding Water Quality" on **Friday, March 15th**. In this insightful episode, [Kalpna Solanki](#), President and CEO of the [Environmental Operators Certification Program](#), delves into the often overlooked yet critical aspects of Backflow prevention.

Backflow incidents pose a significant threat to water quality, and Kalpna Solanki brings her extensive expertise to the forefront, sharing real-life case studies and valuable insights for industrial water treaters. The episode explores the importance of Backflow prevention devices, the role of Environmental Operators, and the dire consequences of neglecting these crucial components in water treatment facilities.

Kalpna emphasizes, "You are putting the public's health at risk when you don't have the proper systems in place. I would love people to find out about Backflow, what exactly it is, why it's important, and why lawmakers should be paying more attention to this so that we don't have these incidents of people accidentally, literally, being poisoned via their drinking water because it is completely preventable. That's the thing about it. It is completely preventable, and it's not a big ticket item."

Listeners can expect to gain a deeper understanding of Backflow prevention, emergency response teams, and the significance of maintaining and testing prevention devices. The episode also addresses the potential legislative gaps and the need for a united front to fortify water safety.

SCALE UP YOUR KNOWLEDGE

This episode is a valuable resource for industrial water treaters, providing practical insights, expert advice, and a call to action for prioritizing Backflow prevention in water treatment facilities. As Kalpna Solanki puts it, "It's a career with lots of opportunities, and we are here to change the narrative and ensure that more people recognize the importance of this crucial field."

Don't miss this opportunity to scale up your knowledge on Backflow prevention and contribute to safeguarding water quality. Tune in to Scaling UP! H2O on your favorite podcast platform, or visit scalinguph2o.com on Friday, March 15th, to access this enlightening episode.

ENVIRONMENTAL OPERATORS CERTIFICATION PROGRAM

The Environmental Operators Certification Program (EOCP) plays a crucial role in shaping the careers of Environmental Operators responsible for ensuring the safe and continuous operation of water and wastewater systems. These skilled individuals are at the forefront of delivering clean water to our homes and businesses, safeguarding the environment, and promoting public health. The EOCP provides certification for Operators in Training and Level I Operators, recognizing their expertise in maintaining and repairing equipment, monitoring data, and ensuring the quality of water and wastewater systems. With a comprehensive educational approach, the EOCP offers programs through various institutions, allowing individuals to enter this vital profession. Beyond job stability and competitive wages, a career as an Environmental Operator offers a purposeful and fulfilling journey, contributing to a healthy community and protected environment. Join EOCP in the mission of safeguarding the environment, promoting public health, and making a difference every day.

For more information about becoming an Environmental Operator, visit eocp@eocp.ca
